

Triple-Tiller Airy

Effective Stubble Cultivation

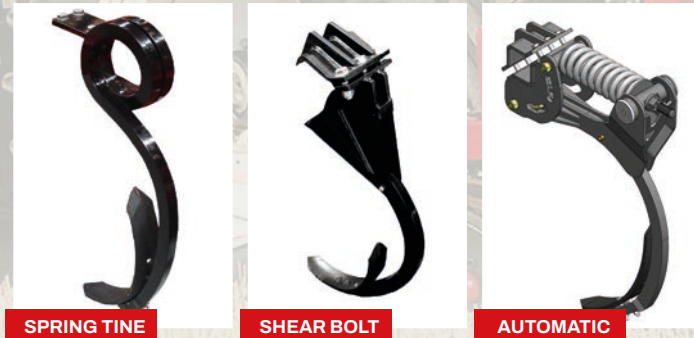

Ideal for Stubble Cultivation

Triple-Tiller Airy leaves the soil aerated - an advantage in stiff clay soil types during the winter season.

With 3 rows of harrow tines and a row spacing of only 25 cm, efficient harrowing and effective soil loosening are ensured. The subsequent eradicator discs and the longfinger harrow ensure that the field is levelled.

The Triple-Tiller Airy is available with 4 different tines

- Spring tine 35x35 mm - work depth 0-20 cm (2.50 - 3.50 m)
- Spring tine 40x40 mm - work depth 0-30 cm (4.00 - 6.00 m)
- Shear bolt - work depth 0-30 cm
- Automatic tine w/spring - work depth 0-30 cm
