## **EC DECLARATION OF CONFORMITY**

in accordance with the EU Machinery Directive 2006/42/EC  
applicable as from December 29<sup>th</sup> 2009:

HE-VA ApS  
N. A. Christensensvej 34,  
DK-7900 Nykøbing Mors

hereby confirms that the following machine has been manufactured in accordance with the Council  
Directive 2006/42/EC.

The declaration comprises the following machines:

Top-Strigle with 5 bars  
3,0m – 4,0m rigid  
4,0m – 10,0m hydraulic

A handwritten signature in blue ink, appearing to read 'Villy Christiansen', written over a horizontal line.

Nykøbing the 28th february 2011 Villy Christiansen

The undersigned is furthermore authorised to compile technical documentation for the above machine.

## **Delivery Check**

Check the Top-Strigle for any damage when it is received at either the dealer and the final customer. Check that the frame construction has not been exposed to impacts. Check the air-pressure in the tires before operating.

Check the hydraulic hoses for cuts and squeezing damages. Check also the other hydraulic components, are not damaged during transport.

## **Machine description**

The Top-Strigle is a 5 bar strigle which is suitable for aeration of pasture or spreading out heaps of straw as well as making seeds from weeds and wasted grain germinate. The machine can only be delivered as tail mounted option.

The machine can be delivered with two different types of tines:

- 12 mm x 440 mm tines for aeration of pasture
- 16 mm x 660 mm tines for spreading straw and make undesirable seeds germinate

Standard equipment:

- 5 hydraulic adjustable bars

Row spacing:

- With 12 mm long finger tines: 6,0 cm
- With 16 mm long finger tines: 8,3 cm

Distance between bars:

- 500 mm

Optional equipment:

- Support wheels 2x2 pcs. of 200/60x14,5"

### Technical specifications

Working width	Tine size	Transport width	Transport-height	No. of tines	HP requirement	Weight in kg
3,0m rigid	16mm	3050	1500	36	95-115	930
4,0m rigid		4050	1500	48	110-135	1170
4,0m hydr.		1500	2100	48	110-135	1590
5,0m hydr.		1500	2600	60	130-155	1780
6,0m hydr.		1500	3100	72	155-180	1950
7,0m hydr.		1500	3600	84	190-230	2150
8,0m hydr.		1500	3600	96	225-275	2390
9,0m hydr. 3-sections		2960	3800	108	250-300	3170
10,0m hydr. 3-sections		2960	3800	120	250-300	3490
Tyre pressure			3,8 bar / 55 psi			
Oil pressure			min. 150 bar			
Hydraulic outlets			2 double acting			
Quick couplings, standard			Sterling type E 402			
Hydraulic oil: The machine is filled with			Hydro Texaco HD32 Specification DIN 51524-3 / ISO 11158 L-HV			

## **Safety around the Top-Strigle**

Do not operate the machine, if **any people<sup>1</sup>** are at risk in **the dangerous area<sup>2</sup>**.

When persons are at risk in the dangerous area (e.g. when doing adjustments, maintenance or connect or disconnecting), the following points must be met:

- Lower the machine on solid ground.
- Hydraulics must be relieved.
- Tractor must be turned off, and the key removed.
- Driver must be aware of, when operating that there is no persons at risk in the dangerous area.

Most accidents when operating the machine, transporting and doing maintenance occurs, when avoiding the most simple safety regulations.

For this reason, it is of highest importance, that any person who is operating the machine, strictly follows the safety regulations and other instructions, which belongs the machine.

The machine must only be operated, maintained and fixed by persons, who is confidential with and skilled for this work and is aware of moments of danger, which can occur.

**ATTENTION!! Rotating parts and clothes in a loose condition, is a dangerous combination.**

**IMPORTANT!! It is strictly prohibited for any person to take place on the frame or chassis of the machine, when it is either operating or the tractor is idling.**

### **Instructions for transport at public roads:**

Before transport at public roads, make sure that the attachment of the implement to the tractor, is in accordance with the local rules and regulations in force (permitted total weight, permitted axel load, transport width, lights and warning signs).

**When driving at public roads, the tines must be folded towards the frame. This will reduce the width of the machine substantially.**

### **Front axel load:**

When the implement is attached and at maximum load, the tractors driving properties must be ensured. Check that the front axel is sufficiently loaded. The front axel load must be at least 20% of the tractors weight. Permitted axel load and total weight for the tractor must be respected.

**NB! The driving, controlling and braking properties are affected by the attached implement.**

---

<sup>1</sup> People at risk: Any person, who is completely or partially in the dangerous area.

<sup>2</sup> Dangerous area: At the machine and underneath it, and in a distance of 4 m from it.

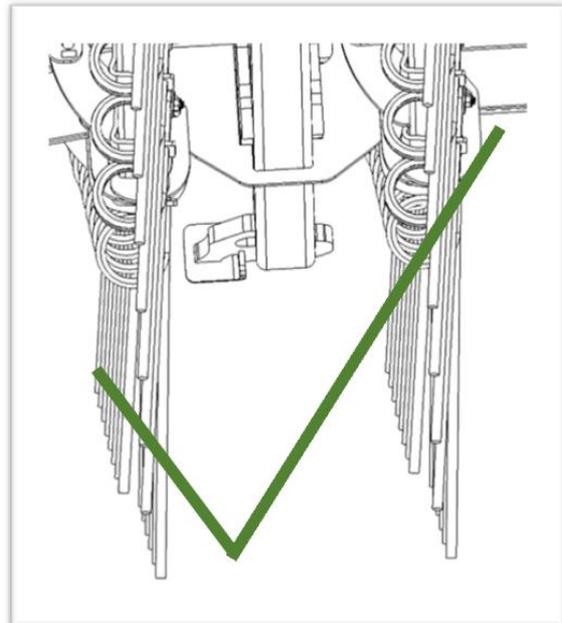

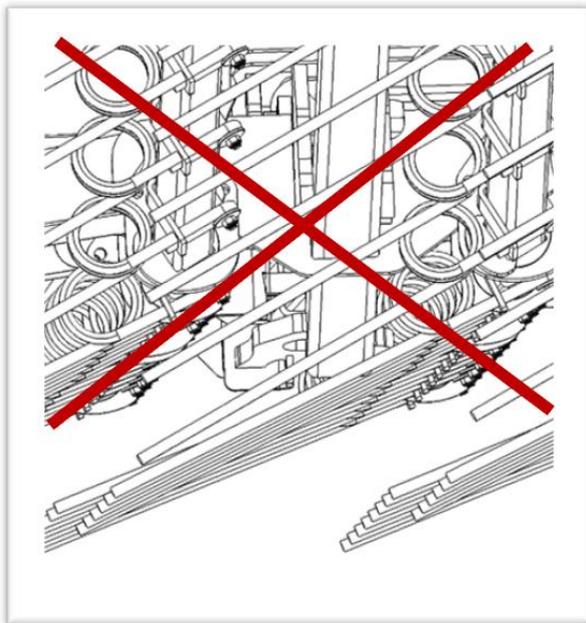

## Safety Instructions, regarding Hydraulic System

- The highest allowable pressure, is 225 bar.
- It is recommended to mark the hydraulic connections between the implement and tractor, to avoid incorrect operation!
- When checking for hydraulic leaks, suitable safety gear must be used due to danger. (Safety, goggles, gloves, etc.)  
At high pressure, hydraulic oil can penetrate the skin and cause serious injuries.
- Before any work at the hydraulic system, the implement must be lowered to solid ground. Pressure must be relieved, engine stopped, and ignition key removed.
- Check the hydraulic hoses on a regular basis, however, every six months as a minimum due to any cracks, wear and tear, etc. Replace any defective hoses immediately.
- Hydraulic hoses last for no more than 5 years.  
New hydraulic hoses must be identical to the manufacturer's specifications.

## Working with the Top-Strigle

**Warning: For 9,0 - 10,0 meter machines only, when folding and unfolding wing sections the tines must always be in work position.**

There is no standard tine angle recommended. The operator may adjust to achieve the desired results. The following issues listed must be taken in consideration:

- Actual settings will vary with tine wear
- Ensure frame is leveled horizontal
- Operate with the lift hydraulic in float position
- For best results in stubble operate at 14 - 18 km/h, in pasture 8 - 12 km/h
- A more aggressive tine angle will hold up straw for a longer period, allowing for a more even distribution of residue
- Breaking down straw is much more effective in dry conditions
- A second pass may be required in extremely heavy straw conditions. Then work the second pass at a 30° - 45° angle to how it was worked the first time
- To prevent tine damage, avoid tight turning

### Maintenance

After 10 hours of operation, tightening of wheels, bearings and stop rings must be done. If this is not respected our warranty will lapse.

<b>Maximum torque according to ISO 898-1 in Nm. w/lubricated thread</b>			
<b>Metric thread</b>	<b>Quality 8.8</b>	<b>Quality 10.9</b>	<b>Quality 12.9</b>

Hub bolts M18x1,5 fine thread		360	
Hub bolts M22x1,5 fine thread		550	

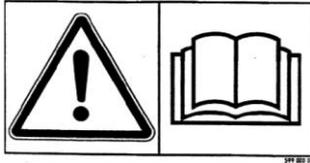

Eventually damages at the paint must be repaired at least once in the season. This will preserve and make the machine stay in a good condition for many years.

## Markings on the machine

Several markings are located at your machine, which contains **safety regulations** and other instructions to inform about correct operating.

Please read these instructions carefully, and make the driver aware about the markings and **safety regulations** in this Operating Instructions. Keep the markings clean and readable. If they are not, they must be replaced.

### Safety and other markings on the machine

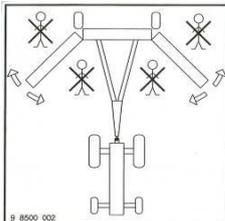

Study the Operating Instructions thoroughly before any operation of the machine and observe all safety instructions.

Plate with number and year of manufacture.

Plate with number and year of manufacture.

Take care that no persons are within the machine's hazardous area during the unfolding and folding procedure.

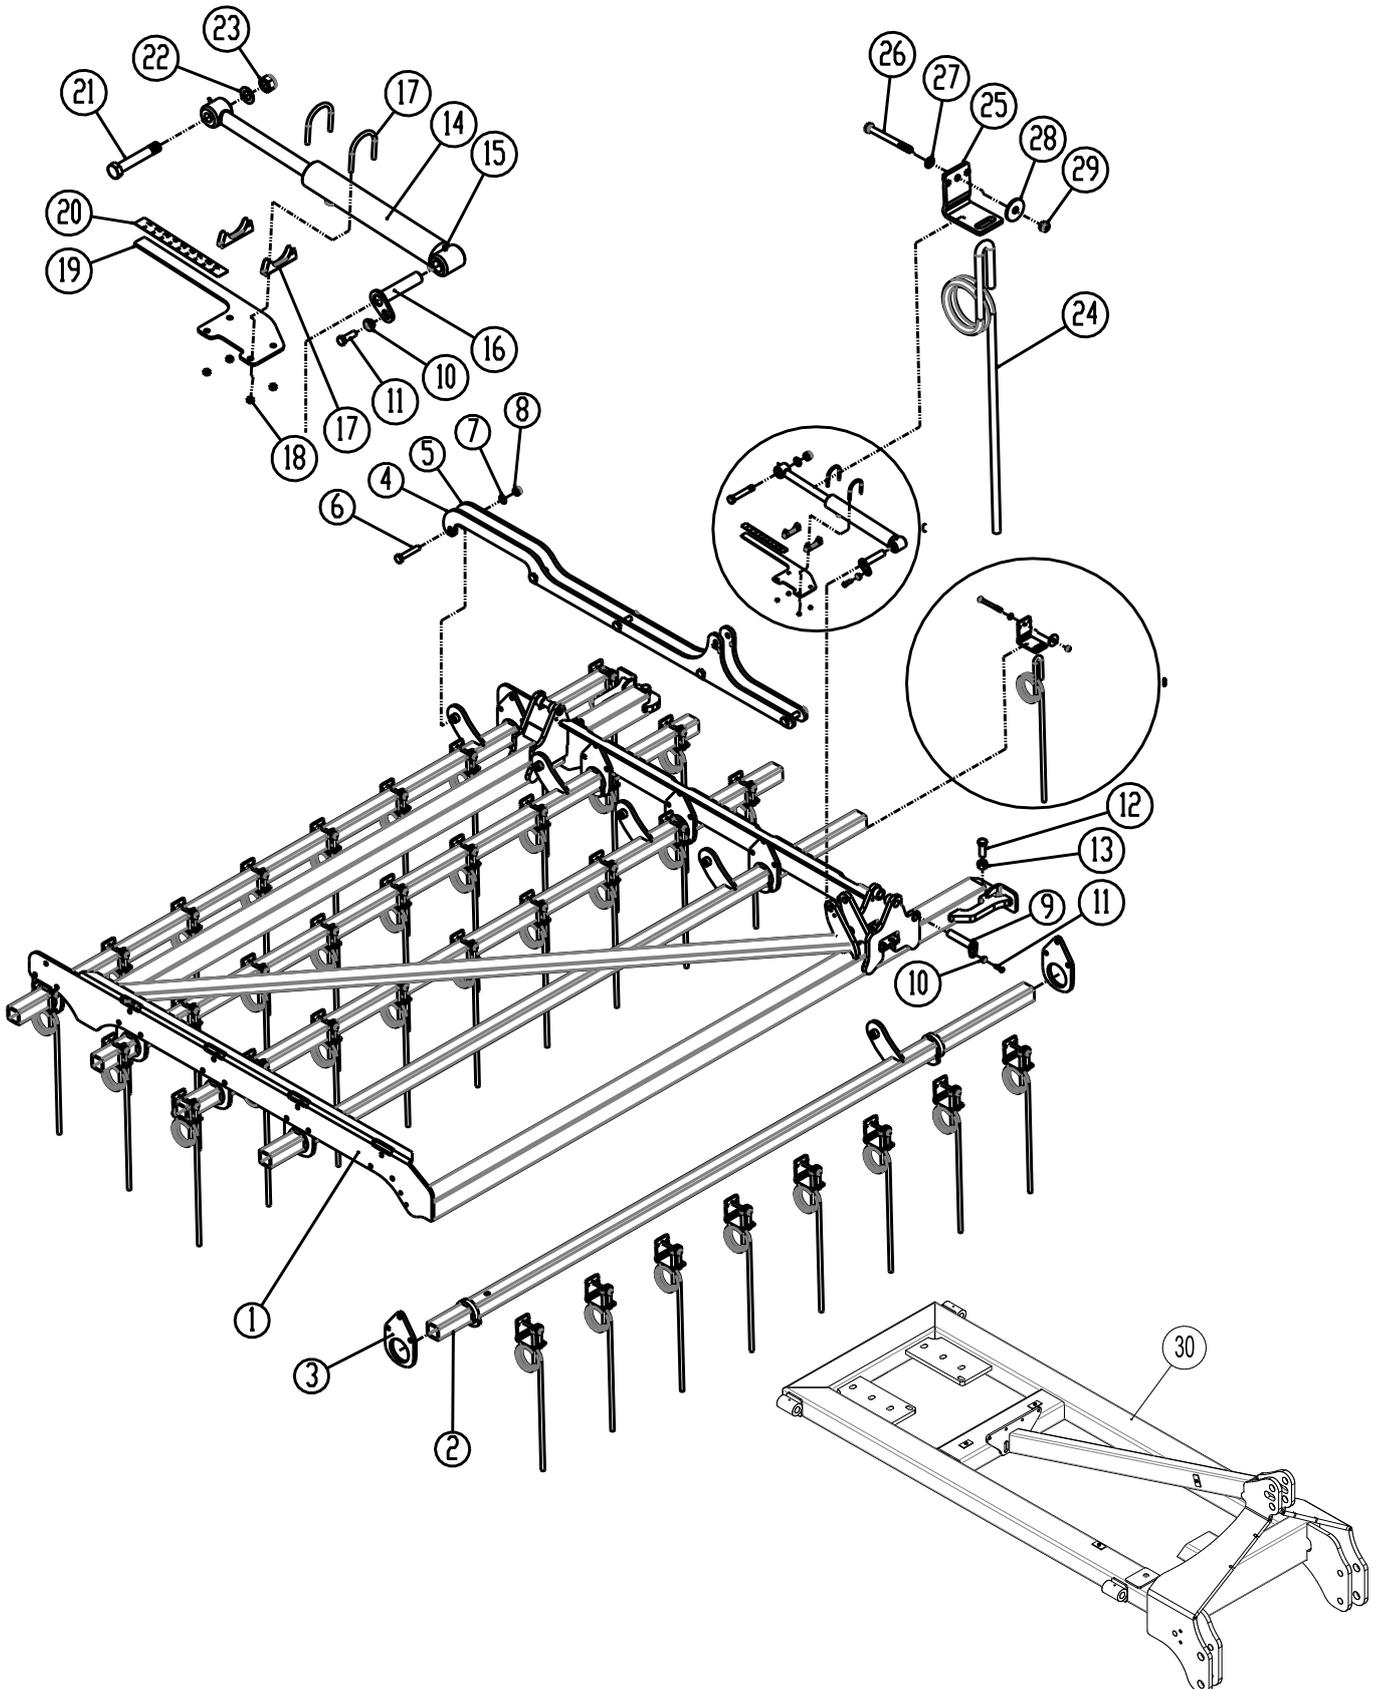

## Disposal

When, after many years of use, the machine is to be regarded as end-of-life, it must be disposed of to a registered and approved product dealer. This will carry out the statutory discharge and disposal of hydraulic oil, as well as sorting materials for further processing for recycling.

## Spare parts list

## Hydraulics

### 5,0 - 8,0 meter 5 bar Top-Strigle

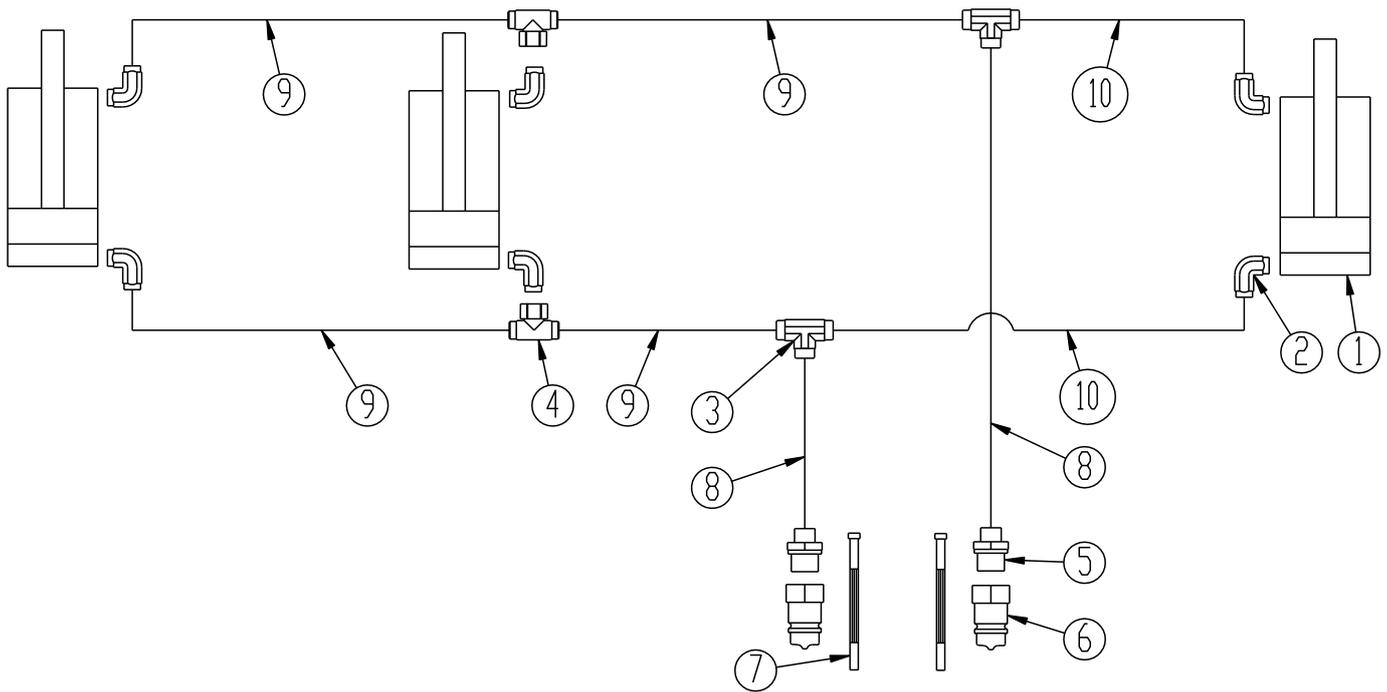

Pos.	Part no.	Description	5,0 - 6,0 - 7,0 - 8,0m
1	690200060	Cylinder 70/40 x 500	2
2	1290076	Cylinder 50/30 x 250	2
3	0442350	Ball valve 3/8"	2
4	690203130	Fitting, adjustable 12-3/8" mounted w/O-ring	2
5	690203106	Fitting 90° 12-3/8" BSP	2
6	690203006	Fitting 90° 10-3/8" BSP	6
7	690203015	Connector T10	4
8	0446751	Fitting straight Ø10 x 3/8"	2
9	0444020	Quick coupling 1/2", male	4
10	0446752	Fitting straight Ø10 x 1/2"	4
11	-	Straps, 2 pcs. green, 2 pcs. blue	4
12	690201033	Hydraulic hose 1/4" L = 2500 mm	1
13	690201033	Hydraulic hose 1/4" L = 2500 mm	1
14	0454250	Hydraulic hose 1/4" L = 1010 mm	1
15	0454250	Hydraulic hose 1/4" L = 1010 mm	1
16	0454250	Hydraulic hose 1/4" L = 1010 mm	1
17	0454250	Hydraulic hose 1/4" L = 1010 mm	1
18	0454211	Hydraulic hose 1/4" L = 710 mm	1
19	690201033	Hydraulic hose 1/4" L = 2500 mm	1
20	0454645	Hydraulic hose 1/4" L = 2300 mm	1
21	0454591	Hydraulic hose 1/4" L = 2000 mm	1
22	0454591	Hydraulic hose 1/4" L = 2000 mm	1
23	0454211	Hydraulic hose 1/4" L = 710 mm	1

**Folding 9,0 - 10,0m**

Pos.	Part no.	Description	9,0 - 10,0 m
1	690200301	Cylinder 80x40x400 $\varnothing 30/\varnothing 30$ 45° (H)	2
2	690200300	Cylinder 80x40x400 $\varnothing 30/\varnothing 30$ 45° (V)	2
3	690203006	Fitting 90° 10-3/8" BSP	6
4	690203106	Fitting 90° 12-3/8" BSP	2
5	0446751	Fitting straight $\varnothing 10$ x 3/8"	12
6	0442350	Ballvalve 3/8"	2
7	690203130	Fitting adjustable $\varnothing 12$ w/O-ring 3/8"	2
8	690203103	Fitting straight $\varnothing 12 \times 1/2$ " BSP	2
9	0444020	Quick coupling 1/2", male	2
10	660501440	Connecting block m/12 way 3/8" BSP	1
11		Straps	2
12	0454313	Hydraulic hose 1/4" L = 1130 mm	4
13	690201033	Hydraulic hose 1/4" L = 2500 mm	2
14	0454645	Hydraulic hose 1/4" L = 2300 mm	2

**Tine angel 9,0 - 10,0 m**

Pos.	Part no.	Description	9,0 - 10,0 m
1	1290076	Cylinder 50/30 x 250	3
2	690203006	Fitting 90° 10-3/8" BSP	6
3	690203015	Connector T10	2
4	690203014	Connector T10 adjustable	2
5	0446752	Fitting straight Ø10 x 1/2"	2
6	0444020	Quick coupling 1/2", male	2
7		Straps	2
8	690201033	Hydraulic hose ¼" L = 2500 mm	2
9	0454215	Hydraulic hose ¼" L = 820 mm	4
10	0454500	Hydraulic hose ¼" L = 1600 mm	2
