## EY- VAATIMUSTENMUKAISUUSVAKUUTUS

konedirektiiviin 2006/42/EY mukaisesti  
voimassa 29. joulukuuta 2009 lähtien

HE-VA ApS  
N. A. Christensensvej 34,  
DK-7900 Nykøbing Mors

vakuuttaa täten, että alla mainitut koneet täyttävät  
neuvoston direktiivin 2006/42/EY vaatimukset.

Edellä oleva vakuutus koskee seuraavia koneita:

Tip - Roller 6,3m – 7,3m – 8,2m – 9,5m – 10,2m

Nykøbing 29. Joulukuuta 2009

Villy Christiansen

Allekirjoittanut on myös pätevä laatimaan teknisen dokumentaation edellä mainituille koneille.

## **Description of the machine**

The Tip-Roller is a 3-sectioned hydraulic, wheel mounted roller. Tip-Roller is to be used for packing the top soil, to maintain the content of moisture in it, and to eliminate not solid stones from the surface of the cultivated area.

The roller sections has an independent suspension. Side sections are center-mounted in an intermediate joint, connecting the side sections to the wheel frame, which gives the sections a perfect adaption to the ground in uneven areas. The changing between transport- and work position is by hydraulic force. The roller has a low and compact transport position with a width of 2,42 meters.

**Read the manual before operating the roller and strictly follow the safety instructions.**

## **Vastaanota Control**

Tarkista, ettei jyrässä ole vaurioita. Tarkista, ettei hydraulikkaletkuissa ole viiltoja tai puristusvaurioita. Tarkista myös, ettei hydrauliiikan muut komponentit ole vaurioitunut kuljetuksen aikana.

Tarkista, ettei runkorakenne ole vaurioitunut. Tarkista myös, ettei jyrälohkoihin ei ole kohdistunut iskuja, jotka ovat voineet vaurioittaa valukiekkoja tai kaksoistiivistettyjä kuulalaakereita.

*Tarkista lopuksi, että kuljetuspyörät ovat kiristetyt ja kunnossa.*

*Check the air pressure in the tyres according to Technical Specifications chart next page*

### **Instructions for unloading and final assembly**

In order to minimize the roller's space during transport, the roller is supplied partially separated from the factory. If the machine is delivered unassembled, it must therefore be completely installed first.

### **Transport Brackets**

At delivery the machine is mounted with brackets for hoisting gear, which is not painted.

These brackets is for attachment of chains or straps, when loading or unloading the machine from the transport vehicle, and they must be dismantled before use.

## Käyttöohjeet

### Kyt kentä

On delivery the roller is in transport position. When the roller is attached, check that the towing hook height is 500-600 mm. Reverse the tractor, put in and **secure** the draw bolt.

Attention: Check that the towing eye fits the height of the tractors drawbar

Toimitettaessa jyrä on kuljetusasennossa. Jyrä kytketään traktoriin.

Nosta tukijalka ylös ja aseta se vetopuomin kuljetustukien varaan. Liitä hydrauliiikan neljä letkua traktorin ulosottoihin.

Jyrä vaatii kaksi 2-toimista hydrauliiikan venttiiliä.

Kääntösynterinin letkuissa on **punainen** raita.

Lohkosynterinin letkuissa on **sininen** raita.

### **Tärkeää:**

Tarkista, että tehtaalla asennettu urosliitin sopii traktorin naaraspuoliseen pikaliittimeen.  
 Paineista kääntösynterini (punainen raita) niin, että lohkot nousevat irti kuljetustuista.  
 Tämän jälkeen lohkosynterini (sininen raita) paineistetaan niin, että lohkot kääntyvät ääriasentoon taakse.  
 Vapauta kääntösynterinin paine, jolloin jyrä siirtyy eteenpäin alas käyttöasentoon.  
 Kun jyrä on maassa, vapautetaan hallintavipu ja jyrä on valmiina käyttöön.

## **Transport**

At change-over for transport, the roller is tipped totally backward by pressurising the tip cylinder. Now pressurise the wing cylinder so that the side sections turn forward, towards the stop on the transport fittings of the drawbar.

When both sides lie in parallel with the drawbar, they are lowered down into the transport fittings by unpressurising the tip cylinder. Then relieve the pressure on all hydraulic hoses, and the roller is ready for transport.

### **INSTRUCTIONS FOR TRANSPORT AT PUBLIC ROADS:**

Before transport at public roads, make sure that the attachment of the implement to the tractor, is in accordance with the local rules and regulations in force (permitted total weight, permitted axel load, transport width, lights and warning signs).

### **FRONT AXEL LOAD:**

When the implement is attached and at maximum load, the tractors driving properties must be ensured. Check that the front axel is sufficiently loaded. The front axel load must be at least 20% of the tractors weight. Permitted axel load and total weight for the tractor must be respected.

**NB! The driving, controlling and braking properties are affected by the attached implement**

### **When rolling**

Speed: max. 10 km/h.

When turning, drive in wide curves as far as possible. The turning should be performed no sharper, than all roller rings are still rotating forward.

Only lower the wheels when making ready for transport position.

Do not drive over any large stones, which are not moveable.

### **Kuljetus**

Jyrä siirretään kuljetusasentoon nostamalla jyrä ääriasentoon taaksepäin paineistamalla kääntösyylinteri. Tämän jälkeen paineistetaan lohkosyylinterit, jolloin sivulohkot kääntyvät eteen vasten vetopuomissa olevia kuljetustukia.

Kun molemmat lohkot ovat samansuuntaiset vetopuomin kanssa, ne lasketaan alas kuljetustukien varaan vapauttamalla kääntösyylinterin paine. Tämän jälkeen vapautetaan kaikkien hydraulikkaletkujen paineet ja jyrä on valmiina kuljetukseen.

## Huolto

- A. Noin 10 käyttötunnin jälkeen kiristetään pyörät, kuulalaakerit ja rajoitinrenkaat. Tarkista letkut, liitokset ja sylinterit, ettei niissä ole vuotoja. Kiristä tarvittaessa.

Maximum torque according to ISO 898-1 in Nm. <b>With lubricated thread</b>			
Metric thread	Quality 8.8	Quality 10.9	Quality 12.9
M10x1,5	47	65	79
M12x1,75	81	114	136
M14x2,0	128	181	217
M16x2,0	197	277	333
M18x2,5	275	386	463
M20x2,5	385	541	649
M22x2,5	518	728	874
M24x3,0	665	935	1120
Pyörän mutteri M18x1, 5 hienokierre			385 Nm
Pyörän mutteri M22x1, 5 hienokierre			550 Nm

### Controle tightening:

- flange for towing eye, 6 bolts M16 or M20 in quality 10.9
- flanges between drawbar and the rear drawbar 6 or 12 bolts M16 or M20 in quality 10.9

- B. 10 käyttötunnin välein voidellaan kaikki sivulohkojen liikkuvat osat kuten myös lohkosylinterin kolme voitelukohtetta. Noin 30 käyttötunnin jälkeen voidellaan vetopuomin tapit.
- C. Käyttökauden jälkeen jyrä puhdistetaan ja voidellaan rasvalla ja öljyllä, and the piston rods must be lubricated with grease or preservative oil.

**Lubrication chart**

 <p>All ends on roller blocks, twice each season and after wash</p>	 <p>2 nipples on wings pivot joints 10 hours</p>
 <p>1 nipple on folding cylinder 2 pc on pin for wings 10 hours</p>	 <p>Rod end of tip cylinder 30 hours</p>
 <p>Cylinder end of tip cylinder 30 hours</p>	 <p>3 nipples on pivot joint between rear drawbar and wheel frame 30 hours</p>
 <p>1 nipple on each Spring-Board cylinder 10 hours</p>	 <p>2 nipples at track eradicator cylinder 10 hours</p>

## Safety at the Tip-Roller

Do not operate the machine, if **any people**<sup>1</sup> are at risk in **the dangerous area**.<sup>2</sup>

When persons are at risk in the dangerous area (e.g. when doing adjustments, maintenance or connect or disconnecting), the following points must be met:

- Lower the machine on solid ground.
- Hydraulic must be relieved.
- Tractor must be turned off, and the key removed.
- Driver must be aware of, when operating that there is no persons at risk in the dangerous area.
- He-Va can not be held responsible for any falling accidents due to washing lubrication and other maintenance tasks
- By the time tires will become tender and explosion danger can occur, when transporting or when controlling tire pressure
- Drive carefully when going from road to paddock and opposite. Be aware of ditches along the road and holes in dirt roads, because gravity point is reasonable high in transport position. Specially when additional equipment is mounted
- The machine must not be operated by persons who have not been properly instructed or trained

Most accidents when operating the machine, transporting and doing maintenance occurs, when avoiding the most simple safety regulations.

For this reason, it is of highest importance, that any person who is operating the machine, strictly follows the safety regulations and other instructions, which belongs the machine.

The machine must only be operated, maintained and fixed by persons, who is confidential with and skilled for this work and is aware of moments of danger, which can occur.

**ATTENTION!!** Rotating parts and loose in a loose condition, is a dangerous combination.

**IMPORTANT!!** It is strictly prohibited for any person to take place on the frame of the machine, when it is either operating or the tractor is idling.

---

<sup>1</sup> People at risk: Any person, who is completely or partially in the dangerous area.

<sup>2</sup> Dangerous area: At the machine and underneath it, and in distance of 4 m from it.

## Safety Instructions, regarding Hydraulic System

1. The highest allowable pressure, is 225 bar.
2. It is recommended to mark the hydraulic connections between the implement and tractor, to avoid incorrect operation!
3. When checking for hydraulic leaks, suitable safety gear must be used due to danger. (Safety goggles , gloves, etc.)  
At high pressure, Hydraulic oil can penetrate the skin and cause serious injuries.  
At injuries, consult a doctor immediately. **RISK OF INFECTION!**
4. Before any work at the hydraulic system, the implement must be lowered to solid ground.  
Pressure must be relieved, engine stopped, and ignition key removed.
5. Check the hydraulic hoses on a regular basis, however, every six months as a minimum due to any cracks, wear and tear, etc. Replace any defective hoses immediately.
6. Hydraulic hoses lasts for no more than 5 years.  
New hydraulic hoses must be identical to the manufacturers specifications.

## Disposal

When, after many years of use, the machine is to be regarded as end-of-life, it must be disposed of to a registered and approved product dealer. This will carry out the statutory discharge and disposal of hydraulic oil, as well as sorting materials for further processing for recycling.

## Markings on the machine

Several markings are located at your machine, which contains **safety regulations** and other instructions to inform about correct operating.

Please read these instructions carefully, and make the driver aware about the markings and **safety regulations** in this Operating Instructions. Keep the markings clean and readable. If they are not, they must be replaced.

### Safety – and other markings on the machine

Study the Operating Instructions thoroughly before any operation of the machine and observe all safety instructions.

Take care that no persons are within the machine's hazardous area during the unfolding and folding procedure.

Plate with number and year of manufacture.

Identification marks for the hydraulic system:

- Red:** Tip cylinder
- Blue:** Folding cylinder
- Green:** Additional equipment

**HUSK - PLEASE NOTE -  
ACHTUNG - ATTENTION**  
**EFTERSPÆND BOLTE  
TIGHTEN UP THE BOLTS  
BOLZEN NACHZIEHEN  
RESSERRER LES BOULONS**

Tighten up the bolts regularly. If this is not performed, our warranty obligations will no longer apply.

## Jousilata

Jousilata vaatii kaksitoimisen hydraulikkaöljyn ulosoton. Jousien kulmaa säädetään hydraulisesti traktorin ohjaamosta. Työsyvyys säädetään käsin. Jouset toimivat toistaan riippumatta mutta ne voidaan myös lukita yhteen tangon avulla (lisävaruste) jos ladalta vaaditaan parempaa tasausominaisuutta. Muutos tehdään helposti ja nopeasti ilman työkaluja.

### Jousiladan sylinterin asennus

Sylinterit on asennettu alla esitetyllä tavalla. On tärkeää, että sylinterit asennetaan oikein niin, että sylintereihin kohdistuva momentti on oikea.

Käytössä oleva kiekkotyyppi ratkaisee asennetaanko sylinterit reikään 1 tai 2. Jos koneessa on 450 tai 550 mm:n kiekot, asennetaan sylinterit reikään 1 ja reikään 1a tai 1b. Jos koneessa on 620 mm:n kiekot, asennetaan sylinterit reikään 2 ja reikään 2a tai 2b.
